

The Tea Room

Taking tea is often a subtle and refined occasion that requires a small measure of artistry. To savour tea time fully, one must know how to leave the daily cares behind and appreciate the simple pleasures of the moment. It is thus related to luxury, whatever the circumstances and is often conducive to wit and good humour.

It was Anna, 7th Duchess of Bedford, who first invited her friends to join her for an additional meal of cakes and of course, tea. Later made popular by Queen Victoria, afternoon tea developed into an indulgent cuisine of crustless sandwiches, delicious cakes and a selection of savouries and pastries.
