## ARTWORK

- National Gallery of Victoria only accepts digital material. PDFs preferred.
- Ads can be submitted as press ready PDF files emailed to [ngvmagazine.editor@ngv.vic.gov.au](mailto:ngvmagazine.editor@ngv.vic.gov.au)
- Please ensure that advertising material is supplied at the correct publication page size. For full page and double page spreads bleed should include trim marks and include 4mm bleed all round. Note that trim marks must be offset 4mm outside the trim and not appear in the bleed area. Please take care to set this in the 'Marks and Bleed' area of your software program
- Double page spreads are to be supplied as separate single page files with 4mm bleed all around. Any critical information across the spine area should be double imaged across the gutter. Double image allowance is 3mm each side of the gutter inclusive of the trim size. Spacing of type across the centre should clear the spine by a minimum of 6mm on each side.

## WE ASK THAT:

- All featured artwork and/or images in supplied material are properly attributed to the artist with a clear copyright line – including the Name of artist, Name of artwork, Year of production and image credit of the artwork.
- All font information embedded. True Type fonts are not to be used. All scans to be at 300dpi minimum and scaled to no more than 100% of their size in the layout. Minimum type size recommended is 10pt. Type reversed out of a four colour image or background should be no smaller than 10pt. Consideration should be made when using coloured type that total density do not exceed ink limits. Also take care when using a light coloured tint where type detail might be lost.
- Correct Grey balance calibration to be set for scans. Ensure colours in your document are CMYK. RGB or other colour formats will be rejected. Spot colours will not be accepted. If you are using PMS colours, these must be broken down into CMYK process colours on the original file.
- Solid Black panels or large areas of background should carry at least 2 colours to reinforce the black print. We recommend at least 20% cyan or magenta. Total ink density should be between 280–310% with a black limit of 90% and allow for 15–20% dot gain. Recommended minimum line weight is 1pt with a maximum of 2 colours overprinting.
- NGV Magazine is printed on 200gsm Alpine Satin (cover) and 90gsm Alpine Satin (text). All artwork supplied should carry the colour profile FOGRA39.
